SUMMARY

10+ years of experience in electronics technical / mechanical assembly. Strong technical knowledge of both communication hardware and cable equipment.

EXPERIENCE

, **Electronic Technician / Mechanical Assembler**

Performed the mechanical assembly, testing, and troubleshooting of DC power supply components, fuse breakers, conductor panels, power, and ground bars. Tested final system and repaired DC power supplies. Responsible for the assembly, troubleshooting and repair of vacuum cabinets. Built safety fences, podiums, media shafts, and plantens for use in industrial printers. Managed parts inventory, restocked and ordered as necessary.

, **Electronic Production Worker (Contract)**

Assembled various transformers and inductors used in high voltage power supplies. Varnished, cleaned, and soldered leads in preparation for production. Prepared sub-assemblies for production.

, **Service Technician**

Performed preventative maintenance, testing, troubleshooting, and repair of all electronic equipment and manufacture of hot tubs. Coordinated the return of all defective products received from the vendors. Managed shipping and receiving of both stock and product. Oversaw the return of all defective products received from both the factory and the dealers to the vendors, as well as verified the status of returned goods.

EDUCATION

University of Fraser Valley

Basic Electrical Wiring

Glenayre In-House Training

Service Mount Technology

Greater Regional Technical College

Electronics Technician Diploma

LICENSES & CERTIFICATIONS

First Aid/CPR-AED, Level C

Canadian Red Cross • Issued Jan 2022 - Expires Dec 2026

SKILLS

Basic Electrical • cabling • digital • soldering both TH / SMT Electronics • Low Voltage • AM/FM Transmitter / Receivers • Testing and repair of modules
